

## BORDOGOLD®

### Content

Copper 20% Calcium 8%

### Features-

1. Bordogold has a broad-spectrum activity.
2. Copper has the property of preventing fungi and bacteria from attacking their crops.
3. Copper provides a wide control spectrum with strong protective contact and residual action.
4. Foliar applications are approved to control many fungal and bacterial diseases.
5. Plants take up some copper from the soil because it is a micronutrient.
6. Copper has been widely used in both conventional & organic production for some time.
7. Copper was one of the first elements used as a plant fungicide (other was sulfur). Thus, it appears, copper fungicides will continue to be important for managing fungal diseases.
8. Copper is an inorganic compound thus it does not breakdown organic compounds, it can accumulate in soil when used intensively.
9. Mixture should be used immediately after preparation.

### Target Crops-

Tomato, Chili, Cucurbits, Potato, Paddy, All other vegetables, Mango, Grapes, Pomegranate, All Other Crops, Cotton etc.

### Target Diseases-

Blight, Fruit Rot, Leaf Spots, Wilt, Gummosis etc.

### Dosage-

Mix 5 gm Bordogold 20 WP in 1 liter of water and spray it thoroughly on the plants. Mixture should be used immediately after its preparation.

### Packing- 500gm
