

## ECOSIL – G

### Content

Silicon, Potassium Humate, Sea weed extract.

### Features-

1. It contains Silicon which is essential element for healthy growth of crops.
2. Use of Silicon reduces requirement of water as it slows down evaporation process of plants.
3. Due to Silicon, photosynthesis in plants increases resulting into better food production within plants.
4. Silicon has been found to increase certain plant species resistance to fungal pathogen attack.
5. Potassium humate can directly affects the metabolism of cells, increase respiration and photosynthesis of plants; enhance the resilience of crops, such as drought, cold, disease and so on. It can release plant nutrients required after decomposition.
6. Improve crop quality and fruit sweetness.
7. It is pure organic silicon supplement to soil and can be used to improve essential silicon supply to plant.

### Target Crops-

All kharif, Rabbi and Summer Season crop (Fruits, Vegetables, Flowers and grain crops used)

### Target Work-

It improves fertility of crops and soil

### Dosage-

5 kg per acre (Dose may vary depending on type of crop, age of crop, soil condition and growth factors)

### Packing-

5 kg bag.
